The use of ASPERIX® Vet should follow the information given in the SPC (summary of product characteristics) and be done under veterinary guidance.

### ASPERIX® Vet

is an effective and sustainable treatment against sea lice infestation.

It delivers immediate results and has a withdrawal period of zero days.

Fish can be harvested immediately after treatment.

No aggregation in the food chain occurs.

After treatment hydrogen peroxide eventually decomposes into water and oxygen only and therefore is considered safe for the environment.

ASC certified farms are not limited in the number of treatment using ASPERIX® Vet.
